MARKET REVIEW

In Kuwait, the economic fundamentals remain the strong in the region and government regulations and economic policies suggest an expansionary tone. Kuwait has also been included in the latest FTSE EM upgrade which is a positive impetus mostly for publicly listed large-caps. Kuwait is also being considered for MSCI benchmark inclusion in the 2019 annual market classification review as of June 2019, which could potentially reclassify it from Frontiers Market to Emerging Market status and possibly attract more than USD 1bn in foreign inflows.

Kuwait's All Share Market gained +5.2% YTD to close at 5,079 with strong performance coming mostly from the Banking and Oil & Gas sectors.
