CHAIRPERSON LETTER

Dear shareholders,

After greetings,

It gives me pleasure, on my own behalf and on behalf of the members of the Board of Directors, to put in your hands the 20th annual report of the company for the year **2020**, in which we present the results of **KFIC** activities and its financial position for this exceptional year.

Kuwait

We are all aware of the dire economic and social damage caused by the new Coronavirus (COVID-19) pandemic, which has shaded over everyone. As the pandemic led to a slowdown in the growth of the global and local economy, which driven central banks worldwide to take precautions, including booking contingent provisions to avoid financial and economic consequences related to the pandemic.

The Kuwaiti economy was negatively affected during the year 2020, as it experienced its largest contraction since 2009 as a result of the repercussions of COVID-19 pandemic, in addition to the decrease in oil revenues resulting from the drop in oil prices and the participation of the State of Kuwait in OPEC production cuts.

During 2020, domestic credit increased by 3.6% and is expected to rise to 4% in 2021, driven by corporate borrowing in the context of accommodative monetary policy and a gradual return to operating conditions. Consumer credit is expected to increase by approximately 3% in 2021, with growth moderating somewhat. The banking sector in general also witnessed a noticeable improvement, as the compound growth rate over the last five years in customer deposit portfolios with local banks and loan portfolios reached 4% and 5% respectively.

On the monetary side, the Central Bank of Kuwait "CBK" reduced its discount rate by 125 basis points, to reach 1.5% during the first quarter of 2020, in parallel with decreases approved by the US Federal Reserve in response to the emergence of **COVID-19** pandemic. In addition, CBK has taken several measures to enhance the capabilities of banks and financing companies so that they can play their role in the economic sector. These procedures included deferring the installments of consumer finance and SME finance, starting from April until September 2020, without charging additional profits as a result of that postponement.

The Kuwaiti dinar maintained its stability against the US dollar during the year **2020**, as the price of the dinar against the US dollar reached 3.03 as on December 31, 2020 and December 31, 2019.

The Market Index witnessed a decrease of 13.3%, and the total market value of the Stock Exchange decreased by **9.2%** in **2020**, to reach **33 Billion Kuwaiti dinars**. The Kuwait Stock Exchange was also promoted to the MSCI Emerging Market Index (MSCI) in November 2020, improving access to international investors and attracting inflow nearly \$ 3 Billion.

2020 Results

KFIC achieved an increase in profits before provisions for credit losses, Board remuneration and Taxes of KD 2 Million in 2020, compared to profits of approximately KD 861 Thousand in 2019. Also KFIC achieved a growth in its revenues by 25% in 2020 to KD 7.5 Million compared to KD 6 Million in 2019, which reflects the success of KFIC in implementing its business model. The Parent Company recognized a net profit amounted to KD 447 Thousand, a profit of 1.4 fils in 2020, compared to a net profit of KD 688 Thousand with a profit of 2.2 fils per share for the year 2019, where the Group net profit reached KD 144 Thousand in 2020 compared to net profits of KD 882 Thousand in 2019.

Below summary shows the results of the Group's business sectors in 2020 compared to 2019:

31 December 2020	Finance	Asset management	Investment & corporate finance	Financial brokerage & online trading	Total

Total liabilities					17,189,407

During 2020, finance costs decreased approximately by 37% compared to 2019, due to the decrease in loans balances by KD 3.8 Million, in addition to the decrease in CBK discount rate by an average of 125 basis points. As a result of KFIC's commitment to pay all the dues towards the creditor banks on their due dates, **KFIC** was able to obtain the approval of the creditor banks to renew credit facilities by KD 7.6 Million for a period of 5 years ends at the end of the year 2025 with the reduction of the interest rate by 1%. Also KFIC was able to obtain a new credit facility amounted to KD 1.5 Million.

During **2020**, wages and salaries costs decreased by **10%** where other operating expenses increased by 28% which is associated with the increase in operating income compared to 2019.

Below is a comparative summary of operating expenses and finance costs from continuing operations of **KFIC** for the years **2020** and **2019**.

	2020	2019
Finance cost	435,745	693,196
Wages and salaries	2,534,516	2,823,223
Other operating expenses	1,796,706	1,404,549
Other provisions "precautionary provisions"	500,000	-
Depreciation	284,397	281,451
Charge (recovery) of credit losses provisions	1,581,832	(16,609)
	7,133,196	5,185,810

Below is a brief on the Company's Divisions

Finance Services Division

The carrying value of the finance portfolio increased by KD 0.5 Million, 3% in 2020 to KD 13.7 Million compared to KD 13.2 Million in 2019. Despite the invasion of COVID-19 pandemic and its accompanying negative effects on all sectors of the Kuwaiti economy, especially the financing sector, the finance sector was able to maintain a stable level of revenues, as the finance sector's revenues reached approximately **KD 1.9 Million** during the years **2020** and **2019**. The sector also achieved good levels of profitability in **2020**, as the sector's net profit before credit losses provision amounted to approximately KD 442 Thousand compared to a net profit of approximately KD 95 Thousand in 2019.

The division managed finance portfolios on behalf of local banks with an amount of approximately KD 17.8 Million in 2020 compared to approximately KD 15.6 Million in 2019, with an increase of 14%.

The plans of the **Finance Sector** are to continue intensifying efforts to collect the company's dues from the remaining defaulting clients (representing loans granted from the years 2010 and earlier), whether through friendly or legal settlements, while maintaining an acceptable level of portfolio size that achieves financial efficiency and is sufficient to cover operating costs and achieve a return that exceeds the cost of capital.

Asset Management Division

As a result of the unprecedented challenges that the world witnessed in **2020** caused by the health crisis, which led to an imbalance in various sectors and fields, the closure of cities and paralysis of air traffic, which negatively affected the global economy and global markets in general and the Gulf markets in particular. The Gulf Cooperation Council (GCC) countries were also affected by the drop in oil prices, which is the backbone of the Gulf economy. Therefore, huge economic projects were canceled, in addition to the decline in bank interest to the lowest levels, reflected in the performance of their markets.

All this significantly negatively affected the performance of the asset management sector, despite the continuous pursuit of the desired investment goals, the protection of the clients' financial position, and the concern for the health and safety of the company's employees at the same time as the funds managed and those held in trust amounted to approximately **KD 213.3 Million** in **2020** compared to approximately KD 237.9 Million in 2019, with a decrease of 11%, which resulted in a decrease in management fees by approximately KD 170 Thousand, with a decrease of 19%. The sector also recorded losses of approximately KD 1 Million in 2020 compared to profits of approximately **KD 438 Thousand** in **2019**, which is mainly due to the decrease in the market value of the portfolios which is linked to the decline in the stock markets. The performance of the Al-Wasam Fund during 2020 was negatively affected, as the Al-Wasam Fund (dedicated to investing in listed shares on the Kuwait Stock Exchange) recognized losses of approximately KD 848 Thousand in 2020, compared to profits of approximately KD 678 Thousand in 2019.

Investment and Corporate Finance Division

This sector adopts a business model that relies on generating revenues continuously through advisory services fees and returns from investments distributed in multiple geographical regions such as Kuwait, the GCC countries and North America, also this sector provides consulting services for solutions and products commensurate with each of our clients in Kuwait and KFIC strategic partners in the Arab Gulf region.

COVID-19 pandemic has shaded the performance of the Kuwait Stock Exchange, which led to a sharp decline in the prices of most stocks, and consequently resulted in reluctance attitude to take exit decisions, which is unlike what happened in previous year, as the sector achieved profits from the exit during the year **2019** amounted to **KD 1.2 Million**, and this is considered the main reason behind the decline in the performance of the sector in the current year, in addition to the revaluation losses of investment properties amounted to KD 164 Thousand in 2020 compared to revaluation gain amounted to KD 20 Thousand in 2019, where the sector net loss in 2020 amounted to **KD 241 Thousand** compared to a net profit of **KD 607 Thousand** in **2019**.

Nevertheless, the investment sector of the parent company succeeded in arranging an exit transaction of the group's assets through one of the group's subsidiaries KFIC Financial Brokerage Company (KSCC), which resulted in the group recording a net profit on sale of amounted to KD 3.1 **Million** included in the results of financial brokerage and online trading services sector.

KFIC has managed over the past years to exit from its non-profit investments (Arab Finance House - Gulf Financial Company - CINET - Y-Telecom in Yemen - Arand the world Company -Gulf Real Estate Development Company, which includes "Mina Real Estate Company") and it will continue in implementing exit plans of some of its direct investments during the coming years.

Financial Brokerage and Online Trading Sector

The investment income in this sector witnessed an exceptional increase in 2020 due to the fact that of one of the group's subsidiaries KFIC Financial Brokerage Company (KSCC) signed an irrevocable agreement to purchase real estate properties with total fair value of KD 12.5 Million in exchange for some of its assets.

The group has partially executed some clauses of this agreement through a sale of **Bayan Holding** - K.S.C.C, Calhoun Equity Company Ltd and Calhoun Debt Company Ltd, resulted in recording a net profit of KD 3.1 Million.

The revenues of this sector also witnessed an increase in 2020 compared to 2019 due to the increase in the value of trading in the Kuwait Stock Exchange from approximately KD 7.9 Billion during the year 2019 to approximately KD 10.8 Billion during the year 2020, with an increase of **35%**, Which positively affected the results of this sector's business, where revenues of financial brokerage and online trading services in 2020 amounted to KD 1,575 Thousand compared to KD **832 Thousand** in **2019**, with an increase of **89%**.

KFIC's Financial Position

As of 31st December 2020, total assets decreased by 1% to KD 56.9 Million compared to KD 57.6 Million as of 31st December 2019. Also total liabilities decreased by 12% to KD 15.1 Million as of 31st December 2020 compared to KD 17.2 Million as of 31st December 2019, mainly due to that KFIC has committed to settle borrowing payments of KD 3.8 Million on their due dates during **2020.** in addition **KFIC** obtained new credit facilities in the amount of **KD 1.5 Million**.

The equity of the parent company, KFIC, increased by 5%, to KD 41.1 Million as of 31st December 2020, compared to KD 39.1 Million as of 31st December 2019.

Below are the key indicators of KFIC financial position as of "31 December 2020" compared to "31 December 2019"

Index	2020	2019
Debt ratios	-5.35%	12%
Liabilities: Equity	0.36 times	0.43 times
Liquidity percentage	71%	31%
Operational return on assets before ECL provision	4.3%	4%
Operational return of equity before ECL provision	5.9%	5%

The parameters above which show the low levels of leverage and the high levels of liquidity reflect the solid financial position of **KFIC** to enable it to grow in its business.

The Board of Directors of the Parent Company recommended not to propose dividends distribution for the year **2020** and to transfer an amount of **KD 75 Thousand** to statutory reserve. This proposal is subject to the shareholders' approval at the Annual General Assembly meeting.

Conclusion

I would like to extend sincere thanks and appreciation to all KFIC shareholders for their support to the company as well as to KFIC's clients for their valued confidence in KFIC Board of Directors and executive management.

I would also like to extend thanks to the regulatory authorities, notably Capital Markets Authority "CMA", Central Bank of Kuwait "CBK" and Ministry of Commerce and Industry for their productive directives and continuous follow up to ensure the stability and integrity of financial sector in the State of Kuwait.

Finally, on behalf of the members of Board of Directors I would like to thank the executive management and all Group's employees for their efforts to achieve **KFIC**'s strategy and objectives.

May God make us successful!

Riham Fuad Al-Ghanim

Chairperson

The Audit Committee Report

1. Audit Committee Chairman Letter

Dear Honorable Shareholders, Greetings,

On behalf of myself and the members of the audit committee, I gladly place in your hands the audit committee report, exclusive for 'Kuwaiti Finance & Investment Company (KFIC)' for the year '2020 in which it supervised all internal and external audit activities in accordance to the work plan that was accepted by the board of directors and the application of the issuance of the Executive Bylaws of Law No. (7) of 2010 and its Amendments regarding the Establishment of Capital Markets Authority and Regulating Securities Activities, issued by the Government.

> Abdullah K. AlTerkait Audit Committee Chairman

2. Audit Committee's goals:

Assisting the Board in its obligation with regards to the integrity of the financial reports, internal monitoring systems and assisting the Board of Directors in further comprehending the analysis of risks that the company's activities face and to reduce its occurrence, besides ensuring compliance with the regulatory guidelines (CBK, CMA and Ministries).

3. Formalization of the Audit Committee:

#	Board Member Name	Membership in the Board	Membership in the Audit Commi tee
1	Mr. Abdullah Khaled Al-Tarkait	Board Member (Independent)	Chairman
2	Mr. Mohammed Mousa AlSaif	Board Member (Non-Executive)	Member
3	Mr. Hamad Falah Al-Hajeri	Board Member (Non-Executive)	Member

4. Committee's Key Tasks

The following is a summary of the responsibilities of the committee based on the line with CMA's Corporate Governance guidelines:

- 1. Review of periodical financial reports, prior to presenting to the board of directors, as well as expressing opinion and endorsing it.
- 2. Recommending appointment or re-appointment of external auditors to the Board of Directors, as well as determining their fees and ascertaining their independence and reviewing their engagement letter.
- 3. Evaluation of the sufficiency of the internal controls that are applied within the company and preparation of a report that includes the committee's endorsements concerning it.
- 4. Supervision of the internal audit functions, including evaluating its performance.
- 5. Ensuring company's compliance with internal policies, as well as regulatory guidelines.

5. Audit Committee Meetings

The CMA guidelines were met regarding the conduct of meetings in each guarter. The details are as follows:-

Meeting # Date of Meeting Board Member Name	17 Feb . L	11 Aug . 5	15 Nov.	27 Dec . 8	Total	%
Mr. Abdullah K. Al-Terkait Audit Committee Member	√	√	√	√	4	100%

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF KUWAIT FINANCE AND INVESTMENT COMPANY K.S.C. (PUBLIC)

Report on the Audit of the Consolidated Financial Statements

Opinion

We have audited the consolidated financial statements of Kuwait Finance and Investment Company-K.S.C. (Public) (the "Parent Company") and its subsidiaries (collectively, the "Group"), which comprise the consolidated statement of financial position as at 31 December 2020, and the consolidated statement of income, consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at 31 December 2020, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs), as adopted by the Central Bank of Kuwait for use by the State of Kuwait.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other matter

The consolidated financial statements of the Group for the year ended 31 December 2019 were audited by another independent auditor who expressed an unmodified opinion on these statements on 17 February 2020.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current year. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

Report on the Audit of the Consolidated Financial Statements (continued) Key Audit Matters (continued)

We have identified the following key audit matter:

Measurement of Expected Credit Losses

The recognition of credit losses on financing receivables to customers is the higher of Expected Credit Loss ("ECL") under International Financial Reporting Standard 9: Financial Instruments ("IFRS 9"), determined in accordance with Central Bank of Kuwait (the "CBK") guidelines, and the provision required by the CBK rules based on classification of credit facilities and calculation of their provision (the "CBK rules") as disclosed in the accounting policies in Note 2.7 and Note 6 to the consolidated financial statements.

Recognition of ECL under IFRS 9, determined in accordance with CBK guidelines, is a complex accounting policy, which requires considerable judgement in its implementation. ECL is dependent on management's judgement in assessing significant increase in credit risk and classification of financing receivables into various stages; determining when a default has occurred, development of models for assessing the probability of default of customers and estimating cash flows from recovery procedures or realization of collateral. Furthermore, as disclosed in Note 25, the COVID-19 pandemic significantly impacted the amount of judgement that management applied in their determination of the ECL. As a result, the ECL has a higher than usual degree of uncertainty and the inputs used are inherently subject to change, which may materially change the estimate in future periods.

Recognition of specific provision on impaired facility under the CBK rules is based on the instructions by CBK on the minimum provision to be recognized together with any additional provision to be recognised based on management estimate of expected cash flows related to that financing facility.

Due to the significance of credit facilities and the related estimation uncertainty and judgement in the impairment calculation, this was considered as a key audit matter. This is further heightened by the high degree of estimation uncertainty due to the economic impacts of COVID-19.

Our audit procedures included assessing the design and implementation of controls over the inputs and assumptions used by the Group in developing the models, its governance and review controls performed by the management in determining the adequacy of credit losses. Further, our audit procedures were updated to incorporate consideration of the economic disruption caused by COVID-19.

Report on the Audit of the Consolidated Financial Statements (continued)

Key Audit Matters (continued)

Measurement of Expected Credit Losses (continued)

With respect to the ECL based on IFRS 9, determined in accordance with the CBK guidelines, we have selected samples of financing facilities outstanding as at the reporting date and checked the appropriateness of the Group's determination of significant increase in credit risk and the resultant basis for classification of the credit facilities into various stages. We involved our specialists to review the ECL model in terms of key data, methods and assumptions used to ensure they are in line with IFRS 9 requirements, determined in accordance CBK guidelines. For a sample of financing facilities, we have checked the appropriateness of the Group's staging criteria, Exposure at Default ("EAD") Probability of Default ("PD") and Loss Given Default ("LGD") including the eligibility and value of collateral considered in the ECL models used by the Group and the overlays considered by the management in view of the ongoing COVID-19 pandemic, in order to determine ECL taking into consideration CBK guidelines. We have also checked the consistency of various inputs and assumptions used by the Group's management to determine ECL.

Further, for the CBK rules provision requirements, we have assessed the criteria for determining whether there is a requirement to calculate any credit loss in accordance with the related regulations and, if required, it has been computed accordingly. For the samples selected, we have verified whether all impairment events have been identified by the Group's management. For the selected samples which also included impaired financing facilities, we have assessed the valuation of collateral and checked the resultant provision calculations.

Impairment of intangible asset

The Group has intangible asset amounted to KD 9.06 million as at 31 December 2020 representing a brokerage license for which management assessed as having an indefinite useful life as detailed in Note 11 to the consolidated financial statements. Intangible asset with an indefinite useful life shall be tested for impairment annually by comparing its carrying amount with its recoverable amount, irrespective of whether there is an indication of impairment.

The annual impairment testing of intangible asset is considered to be a key audit matter due to the complexity of the accounting requirements and the significant judgment and estimates applied by the management that are required in determining the assumptions to be used to estimate the recoverable amount. In addition, the significant impact of the COVID-19 pandemic has led to additional uncertainty in arriving at reasonable assumptions. The recoverable amount of the intangible asset, which is based on the higher of the value in use or fair value less cost to sell, has been derived from discounted forecast cash flow models. These models use several key assumptions, including estimates of future trading volumes and values, revenue growth rates, operating costs, terminal value growth rates and the weighted-average cost of capital (discount rate).

Report on the Audit of the Consolidated Financial Statements (continued)

Key Audit Matters (continued)

Impairment of intangible asset (continued)

The Group engaged an external management expert to assist with the impairment testing.

Our audit procedures included, among others, the following:

- · We involved our internal valuation specialists to assist us in challenging the methodology used in the impairment assessment and evaluating the appropriateness of the discount rates applied, which included comparing the weighted-average cost of capital with sector averages for the relevant markets in which the CGUs operate.
- · We evaluated whether the external management expert has the necessary competency, capabilities and objectivity for audit purposes.
- We assessed the appropriateness of the assumptions applied to key inputs such as trade volumes and values, operating costs, inflation and long-term growth rates, which included comparing these inputs with externally derived data as well as our own assessments based on knowledge of the client and the industry.
- We evaluated the adequacy of the Group's disclosures concerning intangible assets in Note 11 to the consolidated financial statements, including disclosures of key assumptions, judgements and sensitivities.

Other information included in the Group's 2020 Annual Report

Management is responsible for the other information. Other information consists of the information included in the Group's 2020 Annual Report, other than the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Report on the Audit of the Consolidated Financial Statements (continued)

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRSs as adopted for use by the State of Kuwait, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

Report on the Audit of the Consolidated Financial Statements (continued)

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements (continued)

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- · Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

Report on the Audit of the Consolidated Financial Statements (continued)

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements (continued)

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

Furthermore, in our opinion proper books of account have been kept by the Parent Company and the consolidated financial statements, together with the contents of the report of the Parent Company's Board of Directors relating to these consolidated financial statements, are in accordance therewith. We further report that, we obtained all the information and explanations that we required for the purpose of our audit and that the consolidated financial statements incorporate all information that is required by the Companies Law No.1 of 2016, as amended, and its executive regulations, as amended, and by the Parent Company's Memorandum of Incorporation and Articles of Association, that an inventory was duly carried out and that, to the best of our knowledge and belief, no violations of the Companies Law No.1 of 2016, as amended and its executive regulations, as amended, nor of the Parent Company's Memorandum of Incorporation and Articles of Association have occurred during the year ended 31 December 2020 that might have had a material effect on the business of the Parent Company or on its financial position.

We further report that, during the course of our audit, we have not become aware of any violations of the provisions of Law No 32 of 1968, as amended, concerning currency, the Central Bank of Kuwait and the organisation of banking business, and its related regulations, or of the provisions of Law No 7 of 2010 concerning the Capital Markets Authority and its related regulations during the year ended 31 December 2020 that might have had a material effect on the business of the Parent Company or on its financial position.

As at 31 December 2020

INCORPORATION AND ACTIVITIES

Kuwait Finance and Investment Company K.S.C. (Public) (the Parent Company) is a Kuwaiti Shareholding Company incorporated on 29 March 2000 in accordance with Commercial Companies Law No. 15 of 1960 which has been replaced by Law no 1 of year 2016 (New Companies' Law). The Parent Company is regulated by the Capital Markets Authority (CMA) as an investment company in accordance with law no. 7 of year 2010 and as amended by law no. 108 of year 2014 and law no. 22 of year 2015. It is also subject to the supervision of the Central Bank of Kuwait (CBK) as an investment company practicing finance activities.

The Parent Company's shares are listed on the Kuwait Stock Exchange (Boursa Kuwait).

The Parent Company's registered office is at Arabia Tower, Sharq, P.O. Box 21521, Safat 13037, Kuwait.

The Parent Company and its subsidiaries (together referred to as "the Group") are principally engaged in consumer and commercial lending activities, lease, sell and buy vehicles, managing funds and portfolios on behalf of clients, investment banking activities, brokerage activities, providing financial and consulting services and investing in securities and real estate

The consolidated financial statements of Kuwait Finance and Investment Company K.S.C. (Public) (the "Parent Company") and its subsidiaries (collectively, the "Group") for the year ended 31 December 2020 were authorised for issue by the Board of Directors on 4 March 2021 and are subject to the approval of the shareholders of the Parent Company in the Annual Meeting of General Assembly.

The consolidated financial statements for the year ended 31 December 2019 were approved by the Parent Company's shareholders at the annual general assembly meeting ("AGM") held on 25 June 2020. No dividends were declared by the Parent Company.

2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES

2.1 **Basis of preparation**

The consolidated financial statements of the Group were prepared in accordance with the regulations issued by Central Bank of Kuwait (CBK) for financial services institutions in the State of Kuwait. These regulations require that the expected credit loss ("ECL") on credit facilities to be measured at the higher of the amount computed under IFRS 9 in accordance with CBK guidelines or provisions as required by CBK instructions; the consequent impact on related disclosures; and the adoption of all other requirements of International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board ("IASB") (collectively referred to as IFRS, as adopted for use by the State of Kuwait).

The consolidated financial statements have been presented in Kuwaiti Dinar which is also the Parent Company's functional and presentation currency.

The consolidated financial statements have been prepared under the historical cost convention except for the measurement at fair value of financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income, finance receivables at fair value through other comprehensive income and investment properties.

Certain comparative information has been represented to conform to current year presentation and reflect the adjustments made for discontinued operations of the Parent Company subsidiary's "KFIC Financial Brokerage - K.S.C.C." since the subsidiary is no longer held for sale as detailed in Note 7. These reclassifications do not affect the previously reported assets, liabilities, equity and profit for the year.

2.2 Changes in accounting policies

New and amended standards and interpretations adopted by the Group

The accounting policies adopted in the preparation of the consolidated financial statements are consistent with those followed in the preparation of the Group's annual consolidated financial statements for the year ended 31 December 2019, except for the adoption of new standards effective as of 1 January 2020. The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective. The adoption of these standards did not have material impact on the financial performance or consolidated financial position of the Group.

As at 31 December 2020

BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)

2.2 **Changes in accounting policies (continued)**

New and amended standards and interpretations adopted by the Group (continued)

Amendments to IFRS 3: Definition of a Business

The amendment to IFRS 3 Business Combinations clarifies that to be considered a business, an integrated set of activities and assets must include, at a minimum, an input and a substantive process that, together, significantly contribute to the ability to create output. Furthermore, it clarifies that a business can exist without including all of the inputs and processes needed to create outputs. These amendments had no impact on the consolidated financial statements of the Group.

Amendments to IFRS 9, IAS 39 and IFRS 7 Interest Rate Benchmark Reform

The amendments to IFRS 9, IAS 39 and IFRS 7 provide a number of reliefs, which apply to all hedging relationships that are directly affected by interest rate benchmark reform. A hedging relationship is affected if the reform gives rise to uncertainty about the timing and/or amount of benchmark-based cash flows of the hedged item or the hedging instrument. These amendments have no impact on the consolidated financial statements of the Group as it does not have any interest rate hedge relationships.

Amendments to IAS 1 and IAS 8 Definition of Material

The amendments provide a new definition of material that states, "information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity." The amendments clarify that materiality will depend on the nature or magnitude of information, either individually or in combination with other information, in the context of the financial statements. A misstatement of information is material if it could reasonably be expected to influence decisions made by the primary users. These amendments had no impact on the consolidated financial statements of the Group.

Amendments to IFRS 16 Covid-19 Related Rent Concessions

On 28 May 2020, the IASB issued Covid-19-Related Rent Concessions - amendment to IFRS 16 Leases. The amendments provide relief to lessees from applying IFRS 16 guidance on lease modification accounting for rent concessions arising as a direct consequence of the Covid-19 pandemic. As a practical expedient, a lessee may elect not to assess whether a Covid-19 related rent concession from a lessor is a lease modification. A lessee that makes this election accounts for any change in lease payments resulting from the Covid-19 related rent concession the same way it would account for the change under IFRS 16, if the change were not a lease modification. The amendment applies to annual reporting periods beginning on or after 1 June 2020. Earlier application is permitted. This amendment had no material impact on the consolidated financial statements of the Group.

2.3 Standards issued but not yet effective

A number of new standards, amendments to standards and interpretations which are effective for annual periods beginning on or after 1 January 2021 have not been early adopted in the preparation of the Group's consolidated financial statements. None of these are expected to have a significant impact on the Group's consolidated financial statements.

As at 31 December 2020

2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)

2.4 **Basis of consolidation**

The consolidated financial statements comprise the financial statements of the Parent Company and its subsidiaries (investees which are controlled by the Group) (collectively the "Group") as at the reporting date. Control is achieved when the Group is exposed, or has rights, to variable return from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee)
- Exposure, or rights, to variable returns from its involvement with the investee, and
- The ability to use its power over the investee to affect its returns

Generally, there is a presumption that a majority of voting rights result in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee
- Rights arising from other contractual arrangements
- The Group's voting rights and potential voting rights

The Group re-assesses at each reporting date whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the Parent Company of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies in line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

Non-controlling interests represent the net assets (excluding goodwill) of consolidated subsidiaries not attributable directly, or indirectly, to the equity holders of the Parent Company. Equity and net income attributable to non-controlling interests are shown separately in the consolidated statement of financial position, consolidated statement of income, consolidated statement of comprehensive income and consolidated statement of changes in equity.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it:

- Derecognises the assets (including goodwill) and liabilities of the subsidiary
- Derecognises the carrying amount of any non-controlling interest
- Derecognises the cumulative translation differences recorded in equity
- Recognises the fair value of the consideration received
- Recognises the fair value of any investment retained
- Recognises any surplus or deficit in profit or loss

As at 31 December 2020

2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)

2.5 **Business combinations and goodwill**

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, measured at acquisition date fair value and the amount of any non-controlling interest in the acquiree. For each business combination, the acquirer measures the non-controlling interest in the acquiree either at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition costs incurred are expensed and included in administrative expenses.

When the Group acquires a business, it assesses the financial assets acquired and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded swaps and profit rate contracts in host contracts by the acquiree.

If the business combination is achieved in stages, the acquisition date fair value of the acquirer's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date through consolidated statement of income.

Contingent consideration, resulting from business combinations, is valued at fair value at the acquisition date. Contingent consideration classified as equity is not remeasured and its subsequent settlement is accounted for within equity. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of IFRS 9 Financial Instruments, is measured at fair value with the changes in fair value recognised in the consolidated statement of profit or loss in accordance with IFRS 9. Other contingent consideration that is not within the scope of IFRS 9 is measured at fair value at each reporting date with changes in fair value recognised in profit or loss.

Goodwill is initially measured at cost (being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interest over the net identifiable assets acquired and liabilities assumed). If this consideration is lower than the fair value of the net assets of the subsidiary acquired, the difference is recognised in the consolidated statement of income.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

Where goodwill forms part of a cash-generating unit and part of the operation within that unit is disposed off, the goodwill associated with the operation disposed off is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed off in this circumstance is measured based on the relative values of the operation disposed off and the portion of the cash-generating unit retained.

A contingent liability recognised in a business combination is initially measured at its fair value. Subsequently, it is measured at the higher of the amount that would be recognised in accordance with the requirements for provisions in IAS 37 Provisions, Contingent Liabilities and Contingent Assets or the amount initially recognised less (when appropriate) cumulative amortisation recognised in accordance with the requirements for revenue recognition.

2.6 Bank balances and cash

For the purpose of the consolidated statement of cash flows, cash and cash equivalents consists of cash at banks, cash in portfolios, and fixed deposits with banks and financial institutions, whose original maturities periods not exceeding three months from the date of placement.

2.7 **Financial instruments**

(a) Classification and measurement of financial assets

The Group classifies its financial assets upon initial recognition into three classification categories: amortised cost, fair value through other comprehensive income ("FVOCI") and fair value through profit or loss ("FVTPL").

The Group determines the classification and measurement approach for its financial assets that reflect the business model in which assets are managed and its contractual cash flow characteristics.

As at 31 December 2020

BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)

2.7 Financial instruments (continued)

(a) Classification and measurement of financial assets (continued)

Business model assessment

The Group determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective. The Group's business model is not assessed on an instrument by instrument basis but at a higher level of aggregated portfolios and is based on observable factors such as:

- The stated policies and objectives for the portfolio and the operation of those policies in practice;
- The risks that affect the performance of the business model (and the financial assets held within this business model) and how those risks are managed; and
- The frequency, volume and timing of sales in prior periods, the reasons for such sales and its expectations about future sales activity.

If cash flows after initial recognition are realised in a way that is different from the Group's original expectations, the Group does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

Assessment of whether contractual cash flows are solely payments of principal and interest (SPPI test)

The Group assesses the contractual terms of financial assets to identify whether they meet the SPPI test. 'Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset. 'Interest' is defined as consideration for time value of money and for the credit risk associated with the principal and for other basic lending risks and costs as well as a profit margin.

1- Financial assets carried at amortised cost

A financial asset is carried at amortised cost if it meets both of the following conditions:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise, on specified dates, to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets carried at amortised cost are debt instruments initially recognized at fair value plus directly attributable costs and subsequently measured at amortised cost using the effective interest rate method. Interest income, foreign exchange gains and losses and charge for expected credit losses are recognised in the consolidated statement of income. Any gain or loss on derecognition is recognised in the consolidated statement of income.

The Group's financial assets carried at amortised cost comprise of finance receivables carried at amortised cost (which include originated loans where loan is provided directly to the borrower, participation in a loan from another lender and purchased loans), financial assets at amortised cost, other assets, bank balances and cash.

2- Financial assets carried at fair value through other comprehensive income (FVOCI)

Debt instruments

A debt instrument is carried at FVOCI if it meets both of the following conditions:

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- its contractual terms give rise, on specified dates, to cash flows that are solely payments of principal and interest on the principal amount outstanding

Debt instrument carried at FVOCI are initially recognized at fair value plus directly attributable transaction costs and subsequently measured at fair value. Interest income calculated using the effective interest rate method, foreign exchange gains and losses and charge for expected credit losses are recognised in the consolidated statement of income. Fair value changes which are not part of an effective hedging relationship are recognised in other comprehensive income and presented in the cumulative changes in fair values as part of consolidated statement of changes equity until the asset is derecognised or reclassified. When the financial asset is derecognised, the cumulative gain or loss previously recognised in other comprehensive income is reclassified to the consolidated statement of income.

The Group's debt financial assets carried at FVOCI represents in finance receivables at FVOCI which are reported in a separate line item in the consolidated statement of financial position.

As at 31 December 2020

BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)

2.7 Financial instruments (continued)

(a) Classification and measurement of financial assets (continued)

2- Financial assets carried at fair value through other comprehensive income (FVOCI) (continued)

(ii) Equity instruments

Upon initial recognition, the Group makes an irrevocable election to classify some of its equity instruments as investments at FVOCI if they meet the definition of equity under IAS 32 Financial Instruments: Presentation, and are not held for trading neither nor contingent consideration recognized by the Group in a business combination. Such classification is determined on an instrument by instrument basis.

Equity instruments at FVOCI initially recognized at fair value plus directly attributable transaction costs and are subsequently measured at fair value. Changes in fair values including foreign exchange component are recognised in other comprehensive income and presented in the cumulative changes in fair values as part of consolidated statement of equity. Cumulative gains and losses previously recognised in other comprehensive income are transferred to retained earnings on derecognition and are not recognised in the consolidated statement of income. Dividend income are recognised in the consolidated statement of income unless they clearly represent a recovery of part of the cost of the investment in which case they are recognised in other comprehensive income. Equity instruments at FVOCI are not subject to impairment assessment.

3- Financial assets carried at fair value through profit or loss

Financial assets in this category are those financial assets held for trading, financial assets which have been designated by management as FVTPL upon initial recognition or debt instruments with contractual cash flows that do not represent solely payments of principal and interest. Management can designate an instrument at FVTPL that otherwise meet the requirements to be measured at amortised cost or at FVOCI only if it eliminates, or significantly reduces, an accounting mismatch that would otherwise arise from measuring financial assets and liabilities on a different basis.

Financial assets at FVTPL initially recognized at fair value and transaction costs are recognized as expenses in the consolidated statement of income. Subsequently they are measured at fair value. Changes in fair value are recognised in the consolidated statement of income. Interest income is recognised using the effective interest method. Dividend income is recognised in the consolidated statement of income when the right to the payment has been established.

Reclassification of financial assets

The Group does not reclassify its financial assets subsequent to their initial recognition other than in the exceptional circumstances in which the Group acquires, disposes of, or terminates a business line "change business model".

(b) Classification and measurement of financial liabilities

Classification of financial liabilities

Financial liabilities "other than classified at fair value through profit or loss" are represented in borrowings and other liabilities.

Measurement of financial liabilities

Financial liabilities other than classified at fair value through profit or loss are initially recognized at fair value, net of transaction costs incurred, and subsequently measured and carried at amortised cost using the effective interest rate method. Any difference between the proceeds (net of transaction costs) and the redemption value is recognized in the consolidated statement of income using the effective interest method.

(c) Recognition and de-recognition of financial assets and financial liabilities

A financial asset or a financial liability is recognized when the Group becomes a party to the contractual provisions of the instrument.

A financial asset is de-recognized when: the rights to receive cash flows from the asset have expired, or the Group retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a "pass through" arrangement, or the Group has transferred its right to receive cash flows from the asset and either has transferred substantially all the risks and rewards of the asset, or has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset. When the Group has transferred its rights to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognized to the extent of the Group's continuing involvement in the asset.

As at 31 December 2020

BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)

2.7 Financial instruments (continued)

(c) Recognition and de-recognition of financial assets and financial liabilities (continued)

A financial liability is derecognized when the obligation under the liability is discharged, cancelled or expired. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a de-recognition of the original liability and a recognition of a new liability.

All regular way purchase and sale of financial assets are recognized on the trade date, which is the date on which the Group commits to purchase or sell the financial instrument.

(d) Offsetting of financial assets and financial liabilities

Financial assets and financial liabilities are only offset and the net amount reported in the consolidated statement of financial position when there is a legal enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. The legal enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Group or the counterparty.

(e) Impairment of financial assets

The Group computes Expected Credit Losses (ECL) for financial assets measured at amortised cost and debt instruments classified as FVOCI.

This will require considerable judgment about how changes in economic factors affect ECL, which will be determined on a probability-weighted basis.

Under IFRS 9, the impairment requirements apply to financial assets measured at amortised cost and debt instruments classified as FVOCI. At initial recognition, allowance is required for expected credit losses ('ECL') resulting from default events that are possible within the next 12 months ('12-month ECL'). In the event of a significant increase in credit risk, allowance is required for ECL resulting from all possible default events over the expected life of the financial instrument ('lifetime ECL').

Equity investments are not subject to Expected Credit Losses.

The Group provides for credit losses on finance receivables measured at amortised cost and finance receivables measured at FVOCI according to the CBK guidelines and shall record the impairment of finance receivables in the consolidated financial position at the higher of ECL under IFRS 9 according to the CBK guidelines, or the provisions required by the CBK instructions (described below in provision for credit losses in accordance with CBK instructions).

Impairment of financial assets other than finance receivables

The Group recognizes ECL on investment in debt instruments measured at amortised cost or FVOCI and on balances and deposits with banks.

Expected Credit losses

The Group has established a policy to perform an assessment at the end of each reporting period of whether credit risk has increased significantly since initial recognition by considering the change in the risk of default occurring over the remaining life of the financial instrument.

To calculate ECL, the Group will estimate the risk of a default occurring on the financial instrument during its expected life. ECLs are estimated based on the present value of all cash shortfalls over the remaining expected life of the financial asset, i.e., the difference between: the contractual cash flows that are due to the Group under the contract, and the cash flows that the Group expects to receive, discounted at the effective interest rate.

The Group applies a three-stage approach to measure the ECL based on the applied impairment methodology, as described below:

Stage 1: 12-month ECL

The Group measures loss allowances at an amount equal to 12-month ECL on financial assets where there has not been significant increase in credit risk since their initial recognition.

As at 31 December 2020

BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)

2.7 Financial instruments (continued)

(e) Impairment of financial assets (continued)

Expected Credit losses (continued)

Stage 2: Lifetime ECL – not credit impaired

The Group measures loss allowances at an amount equal to lifetime ECL on financial assets where there has been a significant increase in credit risk since initial recognition but are not credit impaired.

Stage 3: Lifetime ECL – credit impaired

The Group measures loss allowances at an amount equal to 100% of net exposure i.e. after deduction from the amount of exposure value of collaterals determined in accordance with CBK guideline.

Life time ECL is ECL that result from all possible default events over the expected life of a financial instrument. The 12 month ECL is the portion of life time expected credit loss that result from default events that are possible within the 12 months after the reporting date. Both life time ECLs and 12 month ECLs are calculated on either an individual basis or a collective basis depending on the nature of the underlying portfolio of financial instruments.

Determining the stage of expected credit loss

At each reporting date, the Group assesses whether there has been significant increase in credit risk since initial recognition by comparing the risk of default occurring over the remaining expected life from the reporting date with the risk of default at the date of initial recognition. The quantitative criteria used to determine a significant increase in credit risk is a series of relative and absolute thresholds. All financial assets that are more than 30 days past due are deemed to have significant increase in credit risk since initial recognition and migrated to stage 2, except for retail finance receivables (consumer and housing) that are more than 60 days past due are deemed to have a significant increase in credit risk since initial recognition and migrated to stage 2.

At each reporting date, the Group also assesses whether a financial asset or group of financial assets is credit impaired. The Group considers a financial asset to be credit impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred or when contractual payments are more than 90 days past due. All credit impaired financial assets are classified as stage 3 for ECL measurement purposes. Evidence of credit impairment includes observable data about the following:

- Significant financial difficulty of the borrower or issuer
- A breach of contract such as default or past due event
- The disappearance of an active market for a security because of financial difficulties
- Purchase of a financial asset at a deep discount that reflects the incurred credit loss
- All rescheduled facilities
- Retail facilities from commencement of legal recourse

At the reporting date, if the credit risk of a financial asset or group of financial assets has not increased significantly since initial recognition or not credit impaired, these financial assets are classified as stage 1.

Measurement of ECLs

ECLs are probability weighted estimates of credit losses and are measured as the present value of all cash shortfalls discounted at the effective interest rate of the financial instrument. Cash shortfall represent the difference between cashflows due to the Group in accordance with the contract and the cashflows that the Group expects to receive. The key elements in the measurement of ECL include probability of default (PD), loss given default (LGD) and exposure at default (EAD). The Group estimates these elements using appropriate credit risk models taking into consideration the internal and external credit factors of the assets, nature and value of collaterals, forward looking of macroeconomic scenarios as well as other factors.

- The Probability of Default ("PD") is an estimate of the likelihood of default over a given time horizon. A default may only happen at a certain time over the assessed period, if the financial asset has not been previously derecognized and is still in the portfolio. The Group uses point in time PD (PITPD) for each rating to calculate the ECL.
- The Exposure at Default ("EAD") is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including payments of principal and interest.
- The Loss Given Default ("LGD") is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the financier would expect to receive, including from the realisation of any collateral. It is usually expressed as a percentage of the EAD. CBK guidelines have prescribed list of eligible collaterals and minimum hair-cuts that are applied in determination of LGD. Further, as per CBK guidelines, for unsecured senior and subordinate financing facilities minimum LGD threshold applied is 50% and 75% respectively.

As at 31 December 2020

2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)

2.7 Financial instruments (continued)

(e) Impairment of financial assets (continued)

Expected Credit losses (continued)

The maximum period for which the credit losses are determined is the contractual life of a financial asset, except for financial assets in Stage 2, the Group considers a minimum maturity of 7 years for all finance receivables (excluding consumer financing, and personal housing financing which is regulated by CBK) unless financing facilities have non-extendable contractual maturity and final payment is less than 50% of the total facility extended. For consumer financing and personal housing financing which is regulated by CBK in Stage 2, the Group considers minimum maturity of 5 years and 15 years respectively.

Incorporation of forward looking information

The Group considers key economic variables that are expected to have an impact on the credit risk and the ECL in order to incorporate forward looking information into the ECL models. These primarily reflect reasonable and supportable forecasts of the future macro-economic conditions. The consideration of such factors increases the degree of judgment in determination of ECL. The management reviews the methodologies and assumptions including any forecasts of future economic conditions on regular basis.

Write-offs

The gross carrying amount of a financial asset is written off (either partially or in full) when the Group determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Group's procedures for recovery of amounts due.

Presentation of allowance for ECL in the consolidated statement of financial position

Loss allowances for ECL are presented as a deduction from the gross carrying amount of the financial assets carried at amortised cost. In the case of debt instruments measured at FVOCI, the Group recognises the ECL charge in the consolidated statement of income and a corresponding amount is recognised in other comprehensive income with no reduction in the carrying amount of the financial asset in the consolidated statement of financial position.

Provisions for credit losses in accordance with CBK instructions

The Group is required to calculate provisions for credit losses on credit facilities in accordance with the instructions of CBK on the classification of credit facilities and calculation of provisions. Credit facilities are classified as past due when a payment has not been received on its contractual payment date or if the facility is in excess of pre-approved limits. A credit facility is classified as past due and impaired when the interest or a principal instalment is past due for more than 90 days and if the carrying amount of the facility is greater than its estimated recoverable value. Past due but not impaired and past due and impaired loans are managed and monitored as irregular facilities and are classified into the following four categories which are then used to determine the provisions.

Category	Criteria	Specific provision
Watch list	Irregular for a period of up to 90 days	=
Substandard	Irregular for a period of 91- 180 days	20%
Doubtful	Irregular for a period of 181- 365 days	50%
Bad	Irregular for a period exceeding 365 days	100%

The Group may also include a credit facility in one of the above categories based on management's judgment of a customer's financial and/or non-financial circumstances.

In addition to specific provisions, minimum general provisions of 1% on cash facilities and 0.5% on non-cash facilities are made on all applicable credit facilities (net of certain restricted categories of collateral) which are not subject to specific provisioning. The following classification of credit exposures is considered by the Group in accordance with the instructions of CBK on the classification of credit facilities.

Number of days past due	Classification
Within 90 days	Watch list
More than 90 days but not exceeding 180 days	Substandard
More than 180 days but not exceeding 365 days	Doubtful
More than 365 days	Bad

As at 31 December 2020

BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)

Investments in associates

Associates are those entities over which the Group has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. The excess of the cost of investment over the Group's share of the net fair value of the associate's identifiable assets and liabilities is recognized as goodwill. Goodwill on acquisition of associates is included in the carrying values of investments in associates. Investments in associates are initially recognized at cost and are subsequently accounted for using the equity method of accounting from the date of obtaining significant influence to the date it ceases. Under the equity method, the Group recognizes in the consolidated statement of income, its share of the associate's post acquisition profit or loss, and in other comprehensive income, its share of post acquisition movements in reserves that the associate directly recognizes in equity. The cumulative post acquisition adjustments, and any impairment, are directly adjusted against the carrying value of the associates.

Appropriate adjustments such as depreciation, amortization and impairment losses are made to the Group's share of profit or loss after acquisition to account for the effect of fair value adjustments made at the time of acquisition. If the ownership interest in an associate is reduced but significant influence is retained, only a proportionate share of the amounts previously recognized in other comprehensive income is reclassified to profit or loss where appropriate.

When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivable, the Group does not recognize further losses unless it has incurred obligations or made payments on behalf of the associate.

After application of the equity method, the Group determines at each reporting date whether there is any objective evidence that the investment in the associate is impaired. If this is the case, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value and recognizes the amount as 'Impairment loss of investment in associates' in the consolidated statement of income.

Profit and loss resulting from upstream and downstream transactions between the Group and its associates are recognized in the Group's consolidated financial statements only to the extent of unrelated investor's interests in the associates. Unrealized losses are eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of the associates are to be changed when necessary to ensure consistency with the policies adopted by the Group.

Goodwill and intangible assets

Goodwill is measured as described in Note 2.5. When calculating gains and losses on disposal of an entity or a part of an entity, the carrying amount of goodwill relating to the entity or the portion sold is taken into consideration as part from the carrying amount of that entity or that portion sold.

Intangible assets comprise separately identifiable intangible items arising from business combinations and certain purchased license. Intangible assets with definite useful lives are carried at cost less accumulated amortization and accumulated impairment losses, while intangible assets with indefinite useful lives are not amortised and carried at cost less accumulated impairment losses. Subsequently, intangible assets with definite useful lives are amortized using the straight-line method over their estimated useful economic life, generally not exceeding 20 years, while intangible assets such as brokerage license with an indefinite useful life are not amortised and tested for impairment annually.

2.10 Investment properties

Investment properties are properties held to earn rentals and/or for capital appreciation, and are accounted for using the fair value model.

Investment properties are initially measured at cost, including transaction costs. Subsequently, investment properties are remeasured at fair value on an individual basis based on valuations by independent real estate appraisers. The Group uses the lesser valuation in determining the fair value. The Group reevaluates investments properties on a semi-annual basis or upon occurrence of any material changes in the market conditions whichever is earlier. Changes in fair value are taken to the consolidated statement of income.

Subsequent expenditure is capitalized to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed when incurred. When part of an investment property is replaced, the carrying amount of the replaced part is derecognized.

Investment properties are de-recognized when either they have been disposed of or when they are permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property are recognized in the consolidated statement of income in the year of retirement or disposal.

As at 31 December 2020

BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)

2.10 **Investment properties (continued)**

Transfers are made to or from investment properties only when there is a change in use. For a transfer from investment properties to owner-occupied properties, the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner-occupied property becomes an investment property, the Group accounts for such property in accordance with the policy followed in recognizing and measuring property and equipment up to the date of change in use.

2.11 Property and equipment

Property and equipment include own-used properties, software and other office equipment. Property and equipment are carried at cost, less accumulated depreciation and accumulated impairment losses, and are periodically reviewed for impairment. Cost comprises of purchase cost and all directly attributable costs of bringing the asset to working conditions for its intended use. The useful life of property and equipment is estimated on the basis of the economic utilization of the asset. Depreciation of property and equipment is calculated using the straight-line method to allocate their depreciable values over their estimated useful lives which are determined to be from three to five years.

The property and equipment's residual values and useful lives are reviewed, and adjusted if appropriate, at the beginning of each reporting period.

Gains and losses on disposal are determined by comparing the proceeds with the carrying amount and are recognized within other income in the consolidated statement of income.

2.12 Impairment of assets other than financial assets within the scope of IFRS 9 and investment properties

Goodwill and intangible assets with indefinite useful lives are tested for impairment at least annually. Assets that are subject to amortization or depreciation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less cost to sell and value in use.

For the purpose of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows, known as cash generating units (CGUs). Goodwill is allocated to CGUs to benefit from the synergies of the combination. If the recoverable amount of the CGU is less than the carrying amount of the unit, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to other assets of the unit pro rata, on the basis of the carrying amount of each asset in the unit.

In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risk specific to the asset for which the estimates of future cash flows have not been adjusted. The Group prepares formal five year plans for its businesses. These plans are used for the value in use calculation. Long range growth rates are used for cash flows into perpetuity beyond the five year period.

Fair value less costs to sell is determined using valuation techniques and considering the outcome of recent transactions for similar assets in the same industry and geographical region.

The Group shall assess at the end of each reporting period whether there is any indication that an impairment loss recognized in prior periods for an asset other than goodwill may no longer exist or may have decreased. If any such indication exists, the Group shall estimate the recoverable amount of the asset. The increased carrying amount of an asset other than goodwill attributable to a reversal of an impairment loss shall not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset in prior periods.

2.13 Provisions

Provisions for liabilities are recognized when the Group has a current or a future constructive obligation as a result of past events and it is probable that an outflow of economic resources will be required to settle this obligation and the amount can be reliably estimated.

2.14 End of service benefits

The Group provides end of service benefits to all its employees. As per the Kuwaiti law and the Parent Company's internal policy, the entitlement to these benefits is based upon the employees' final salaries and length of service, subject to the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment. The Group expects this method to produce a reliable approximation of the present value of this obligation.

In addition, with respect to its national employees, the Group makes contributions to Public Institution for Social Security calculated as a percentage of the employees' salaries.

As at 31 December 2020

2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)

2.15 Share capital and treasury shares

Share capital

Ordinary shares are classified as equity.

Transaction costs related to share issuances

Incremental costs directly attributable to the issue of new shares or other instruments classified as equity instruments are recognized in equity as "transaction costs related to share issuances", and are deducted from the proceeds.

Treasury shares

Treasury shares consist of the Parent Company's own shares that have been issued, subsequently reacquired by the Group and not yet reissued or cancelled. The treasury shares are accounted for using the cost method. Under the cost method, the weighted average cost of the shares reacquired is charged to a contra equity account. When the treasury shares are reissued, gains are credited to a separate account in equity (gain on sale of treasury shares) which is not distributable. Any realized losses are charged to the same account to the extent of the credit balance on that account. Any excess losses are charged to retained earnings then reserves. Gains realized subsequently on the sale of treasury shares are first used to offset any previously recorded losses in the order of reserves, retained earnings and the gain on sale of treasury shares account. No cash dividends are paid on these shares. The issue of bonus shares increases the number of treasury shares proportionately and reduces the average cost per share without affecting the total cost of treasury shares. Any capital reduction by amortizing the accumulated losses is considered economic losses which reduces the number of shares. Reserves including equity transactions reserve, equal to the cost of treasury shares held are not available for distribution.

2.16 Foreign currencies

Foreign currency transactions are translated into Kuwaiti Dinars which is the functional and presentation currency of the Group using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in the consolidated statement of income.

Changes in the fair value of monetary securities denominated in a foreign currency and classified as FVOCI are analyzed between translation differences resulting from changes in amortised cost of the security and other changes in the carrying amount of the security. The translation differences related to amortised cost are recognized in the consolidated statement of income, while other changes are recognized in other comprehensive income.

Translation differences on non-monetary financial assets and liabilities held at fair value through profit or loss are recognized in the consolidated statement of income. Translation differences on non-monetary financial assets, such as equity instruments classified as FVOCI, are included in other comprehensive income.

Net assets in foreign subsidiaries and associates that have a functional currency different from the presentation currency are translated into the presentation currency at the exchange rates prevailing at the reporting date. Revenues and expenses of those entities are translated at the average exchange rates for the year. All resulting exchange differences are recognized in the foreign currency translation reserve in other comprehensive income.

On the disposal of a foreign operation (that is, a disposal of the Group's entire interest in a foreign operation, or a disposal involving loss of control over a subsidiary that includes a foreign operation, or a disposal involving loss of significant influence over an associate that includes a foreign operation), all of the exchange differences accumulated in other comprehensive income in respect of that operation attributable to the equity holders of the Parent Company are reclassified to the consolidated statement of income.

2.17 Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable, and represents amounts receivable for service provided. The Group recognizes revenue when the amount of revenue can be reliably measured; when it is probable that future economic benefits will flow to the entity; and when specific criteria have been met for each of the Group's activities, as described below:

As at 31 December 2020

BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)

2.17 **Revenue recognition (continued)**

- Financing income is recognized as income on a time proportion basis to yield a constant periodic interest rate on the balance outstanding based on the effective interest rate method. The recognition of financing income is suspended when loans become impaired.
- Management and advisory fees are recognized based on the terms of the applicable service contract. The portfolio management fees are usually recognized on a time proportionate basis.
- Commission on brokerage services are recognized as the service is provided.
- Rental income from operating leases is recognized on a straight line basis over the lease term.
- Dividend income is recognized when the Group's right to receive payment is established.

2.18 Leases

Operating lease

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating

Right-of-use assets

The Group recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Unless the Group is reasonably certain to obtain ownership of the leased asset at the end of the lease term, the recognised right-ofuse assets are depreciated on a straight-line basis over the shorter of its estimated useful life and the lease term. Right-of-use assets are subject to impairment.

Lease liabilities

At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group, and payments of penalties for terminating a lease if the lease term reflects the Group exercising the option to terminate. The variable lease payments that do not depend on an index or a rate are recognised as expense in the period on which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses the incremental borrowing rate at the lease commencement date if the borrowing rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of finance cost and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the in-substance fixed lease payments or a change in the assessment to purchase the underlying asset.

Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to its short-term leases of property and equipment (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered of low value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

Finance lease

Leases in which a significant portion of the risk and rewards of ownership are retained by the lessee are classified as finance leases.

Finance leases are capitalized at the commencement of the lease at the lower of the fair value of the leased property and the present value of the minimum lease payments.

When the Group is a lessee, each lease payment is allocated between the liability and finance costs. The interest element of the finance cost is charged to the consolidated statement of income over the lease period to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The property and equipment acquired under finance leases is depreciated over the shorter of the useful life of the asset and the lease term.

As at 31 December 2020

2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)

2.18 **Leases (continued)**

Finance lease (continued)

When the Group is a lessor, finance leases are capitalized at the commencement of the lease at the lower of the fair value of the leased property and the present value of the minimum lease payments. Interest income arising from finance leases are recognized by the effective interest rate method and classified as part of finance income.

2.19 Assets classified as held for sale

The Group classifies non-current assets and disposal groups as held for sale if their carrying amounts will be recovered principally through a sale transaction rather than through continuing use. Non-current assets and disposal groups classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell. The criteria for held for sale classification is regarded as met only when the sale is highly probable and the asset or disposal group is available for immediate sale in its present condition. Management must be committed to the sale which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Discontinued operations are excluded from the results of continuing operations and are presented as a single amount as profit or loss from discontinued operations in the consolidated statement of income.

2.20 **Finance costs**

Finance costs on borrowings and finance leases are recognized as expenses in the consolidated statement of income using the effective interest rate method, unless the finance costs are related to qualified assets for capitalization, in which case they are capitalized and considered part of the cost of the qualified assets.

2.21 Earnings per share

Basic earnings per share are calculated by dividing the profit for the year attributable to ordinary equity holders of the Parent Company by the weighted average number of ordinary shares outstanding during the year.

Diluted earnings per share are calculated using the same method as for basic earnings per share by adjusting the weighted average number of ordinary shares outstanding to reflect the potential dilution through the increase in the ordinary shares that could occur if options, warrants, convertible debt securities or other contracts to issue ordinary shares were converted or exercised.

2.22 **Segment information**

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision Maker (CODM).

The Group's businesses are organized into four business segments "Finance, Asset Management, Investment and Corporate Finance, and Financial Brokerage and Online Trading". These operating segments are reported in Note 20.

2.23 Fiduciary assets

Assets held in trust or in a fiduciary capacity are not treated as assets of the Group and accordingly are not included in the consolidated statement of financial position.

3 SIGNIFICANT ACCOUNTING ESTIMATES AND JUDGMENTS

In the process of applying the Group's accounting policies, management has used judgments and made estimates in determining the amounts recognised in the consolidated financial statements. The followings are the areas involving a high degree of judgment or areas where assumptions and estimates are significant to the consolidated financial statements.

Accounting judgments

Classification of financial assets

The Group determines the classification of financial assets based on the assessment of the business model within which the assets are held and assessment of whether the contractual terms of the financial asset are solely payments of principal and interest on the principal amount outstanding. Judgments are required in determining the business model at an appropriate level that best reflects an aggregated group or portfolio of assets which are managed together to achieve a particular business objective. The Group also applies judgment to assess if there is a change in business model in circumstances when the assets within that business model are realised differently than the original expectations. Refer Note 2.7 classification of financial assets for more information.

As at 31 December 2020

3 SIGNIFICANT ACCOUNTING ESTIMATES AND JUDGMENTS (continued)

Uncertainty of accounting estimates

The Group determines assumptions relating to the future. The outcome of accounting estimates are rarely equal to the actual results. Management undertakes these assumptions based on the information that has been available during the year, taking into consideration the economic and political circumstances of the region. Estimates and assumptions that have a material impact attributable to adjustments affecting the carrying values of the assets and liabilities during the next financial year are as follows:

Impairment of intangible assets

The Group calculates the recoverable amount for its intangible assets that have indefinite useful lives annually to determine whether there is an impairment loss to be recorded as per the accounting policy Note 2.12. Recoverable amount is calculated based on the value in use which involves high degree of estimates.

In estimating value in use, cash flows based on the business plans are discounted using relevant discount rate and the terminal value is calculated by estimating the terminal growth rate.

Valuation of investment properties

The fair value of investment properties is determined by real estate valuation experts using recognised valuation techniques and the principles of IFRS 13 Fair Value Measurement.

Investment properties are measured based on estimates prepared by independent real estate valuation experts, except where such values cannot be reliably determined. The significant methods and assumptions used by valuers in estimating the fair value of investment property are set out in Note 11.

Impairment of investments in associates

The Group calculates the recoverable amount for its investments in associates if there is an indication of an impairment to determine whether there is any impairment loss to be recorded.

Recoverable amount is calculated based on the value in use or fair value less cost to sell whichever is higher. In estimating the value in use, cash flows which are based on the associates' business plans are discounted using the relevant discount rate and the terminal value is calculated by estimating the terminal growth rates. Fair value of the unquoted associates is determined by using valuation techniques that take into consideration the market conditions and the difficulties that may be faced by the investee. These involve high degree of estimates.

Fair value of unquoted equity investments

Estimates are used in applying the valuation techniques used to estimate the fair value of unquoted investments. Those techniques include the expected cash flows, recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis and other valuation techniques used by the participants in the market generally which is mainly represented in adjusted net book value method. The Group calibrates the valuation techniques periodically and tests these for validity using either prices from observable current market transactions in the same instrument or other available observable market data.

Impairment of financial assets

The measurement of Expected Credit Losses (ECL) across all categories of financial assets requires judgement, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining Expected Credit Losses (ECL) and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances. The Group estimates Expected Credit Loss (ECL) for all financial assets carried at amortised cost or fair value through other comprehensive income except for equity instruments.

The Group's ECL calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their dependencies. Elements of the ECL models that are considered accounting judgements and estimates, such as:

- Determining criteria for significant increase in credit risk
- ▶ Choosing appropriate models and assumptions for measurement of ECL
- Determination of associations between macroeconomic scenarios and, economic inputs, and the effect on PDs, EADs and LGDs
- Selection of forward-looking macroeconomic scenarios and their probability weightings, to derive the economic inputs into the ECL models
- Establishing group of similar financial assets for the purpose of measuring ECL.

The Group has the policy to regularly review its models in the context of actual loss experience and adjust when necessary.

As at 31 December 2020

3 SIGNIFICANT ACCOUNTING ESTIMATES AND JUDGMENTS (continued)

Uncertainty of accounting estimates (continued)

Significant judgement in determining the lease term of contracts with renewal options

The Group determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

The Group has the option, under some of its leases, to lease the assets for additional periods. The Group applies judgement in evaluating whether it is reasonably certain to exercise the option to renew. This consider all relevant factors that create an economic incentive for it to exercise the renewal. After the commencement date, the Group reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise (or not to exercise) the option to renew (e.g., a change in business strategy).

CASH AND CASH EQUIVALENTS

For the purpose of the consolidated statement of cash flows, cash and cash equivalents comprise of the following:

	2020	2019
	KD	KD
Cash at banks	8,424,761	4,068,064
Cash in investment portfolios	660,229	29,737
Fixed deposits	1,581,524	1,247,294
Bank balances and cash	10,666,514	5,345,095
Fixed deposits with a maturity greater than three months from the date of placement	(7,524)	(7,294)
Fixed deposit blocked	(774,000)	(740,000)
Cash at banks blocked	(1,542,442)	(882,932)
Total cash and cash equivalents	8,342,548	3,714,869

Fixed deposits duration varies from three to twelve months and carry an average effective interest rate of 1.9% per annum as at 31 December 2020 (2019: 2.8%) per annum.

Bank balances and cash amounting to KD 803,704 are pledged against borrowings (2019: KD 1,622,932).

Cash at banks disclosed above include restricted bank balances of KD 1,512,738 (2019: Nil) represents the Group's share in the new regime of guarantee fund established by Boursa Kuwait. This amount is restricted for use by the Kuwait Clearing Company to fulfill the Group's obligations against the short fall in the trade (if any).

FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS 5

	2020 KD	2019 KD
Quoted equity Unquoted equity	1,358,968 2,047,701	2,981,187 2,047,701
	3,406,669	5,028,888

The hierarchy for determining and disclosing the fair value of financial instruments by valuation technique are presented in Note 21.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS As at 31 December 2020

5 FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS (continued)

Financial assets at fair value through profit or loss are denominated in the following currencies:

	2020 KD	2019 KD
Kuwaiti Dinar US Dollar Bahrain Dinar	3,253,439 5 153,225	4,610,283 5 418,600
	3,406,669	5,028,888

As of 31 December 2020, financial assets at fair value through profit or loss amounting to KD 71,888 are pledged against borrowings (2019: KD 29,034) (Note 12).

6 FINANCE RECEIVABLES

a - Finance receivables carried at fair value through other comprehensive income

The increase in ECLs of the finance receivable portfolio was driven by increase in the gross size of the portfolio and movements between stages as a result of increases in credit risk, a deterioration in economic conditions and the effect of the pandemic of COVID-19.

As of 31 December 2020, finance receivables of KD 1,837,697 (2019: KD 555,409) were impaired and provided for. The related provision for those receivables amounted to KD 1,837,697 as of 31 December 2020 (2019: KD 555,409).

As of 31 December 2020, finance receivables amounting to KD 8,413,659 (2019: KD 8,650,564) were performing. Included in these receivables are finance receivables installments that are classified as past due for less than three months but not impaired amounting to KD 269,330 as of 31 December 2020 (2019: KD 146,889). These receivables are not considered impaired. Following is the aging of finance receivables installments which are past due but not impaired:

	2020 KD	2019 KD
One month	152,316	91,182
More than one month till two months	76,781	42,814
More than two months till three months	40,233	12,893
	269,330	146,889

Finance receivables carried at fair value through other comprehensive income are mortgaged against borrowings by simple assignment of right (Note 12).

2010

As at 31 December 2020

FINANCE RECEIVABLES (continued)

b - Finance receivables carried at amortised cost

	2020	2019
	KD	KD
Gross finance receivables	5,677,849	7,484,833
Less: deferred income	(288,297)	(419,360)

	(45,946)	(174,507)	(1,342,772)	(1,563,225)

As at 31 December 2020

6 FINANCE RECEIVABLES (continued)

c - Finance receivables expected credit loss (ECL) (continued)

2019	12m ECL Stage 1 <i>KD</i>	Life time ECL Stage 2 KD	Life time ECL Stage 3 KD	Total ECL charge
Provision for expected credit loss (charge) recovery for finance receivables carried at FVOCI (Net)	(13,673)	18,531	(484,670)	(479,812)
Provision for expected credit loss (charge) recovery for finance receivables carried at amortised cost (Net)	(1,698)	(19,213)	745,804	724,893
	(15,371)	(682)	261,134	245,081

The accumulated expected credit losses calculated as per IFRS 9 according to the CBK guidelines as at 31 December 2020 amounted to KD 4,383,774 (2019: KD 3,816,945), which is higher than provisions computed as required by the CBK guidelines amounting to KD 3,505,454 (2019: KD 3,533,854).

7 ASSETS CLASSIFIED AS HELD FOR SALE

During the fourth quarter of prior year, the Parent Company's management decided to dispose off a group of assets, the Parent Company signed a memorandum of understanding to sell a group of assets which include the Parent Company's interest in its subsidiaries KFIC Financial Brokerage - K.S.C.C., Around the World Holding S.P.C. and Gulf Development Real Estate Company – K.S.C.C. (which also include Mena Real Estate Company K.S.C.P., an associate for the Group).

On 26 December 2019, the Board of Directors of the Parent Company approved the transfer of the Parent Company's interest in Al-Salbookh Trading Company K.S.C.P. ("an associate") to one of the Parent Company's subsidiary, KFIC Financial Brokerage K.S.C.C. which is classified as assets classified as held for sale. The Parent Company sold its subsidiaries, Around the World Holding S.P.C. and Gulf Development Real Estate Company - K.S.C.C. (which also include Mena Real Estate Company K.S.C.P.) with a net carrying value of KD 2,076,166 for a total consideration of KD 2,626,505 and consequently recorded a net gain amounting to KD 550,339.

During the year, the Parent Company completed the transfer of its ownership in Al-Salbookh Trading Company K.S.C.P. ("an associate") to KFIC Financial Brokerage K.S.C.C. ("subsidiary").

On 2 December 2020, the Parent Company received a letter from KFIC Financial Brokerage K.S.C.C.'s target buyer informing the Parent Company that the regulatory authority rejected the buyer's request for acquiring 100% of KFIC Financial Brokerage K.S.C.C. As a result the Parent Company reclassified its investment in KFIC Financial Brokerage K.S.C.C from classified assets held for sale to assets held for use and accounted for as a subsidiary.

On 29 December 2020, KFIC Financial Brokerage – K.S.C.C, signed an irrevocable agreement to purchase real estate properties with total fair value of KD 12,500,000 in exchange for some of its assets which includes: i) certain shares of Bayan Holding Company K.S.C.C (financial assets at fair value through profit or loss), ii) certain shares of Calhoun Equity Company Ltd (investment in associate) iii) certain shares Calhoun Debt Company Ltd. (investment in associate), iv) all shares of Salbookh Trading Company - K.S.C.P (investment in associate), v) Shares of Carolina Agriculture Company -K.S.C.C. (investment in subsidiary), and vi) cash of KD 2,750,000.

The Group has partially executed some clauses of this agreement through a sale of Bayan Holding - K.S.C.C, Calhoun Equity Company Ltd and Calhoun Debt Company Ltd with a total net carrying value of KD 1,568,927 in exchange for a net receivables for a promissory note amounting to KD 4,710,344 (Note 8) and consequently recorded a net gain amounting to KD 3,141,557 included in the consolidated statement of income under investment income. Since the sale of Salbookh Trading Company – K.S.C.P is expected to be executed during the first quarter of 2021, the Group has classified the investment as assets classified as held for sale.

As at 31 December 2020

Investment properties with carrying amount of KD 3,636,000 (2019: KD 3,800,000) are pledged against borrowings (Note 12).

The fair value of the investment properties is determined by independent evaluators in which valuation techniques for inputs are based on observable market and other data either directly or indirectly. The fair value of the investment properties is within level 2 of the fair value hierarchy (Note 21).

As at 31 December 2020

11 **INTANGIBLE ASSETS**

Intangible assets represent a brokerage license in the Group's subsidiary, KFIC Financial Brokerage K.S.C.C. with indefinite useful life. The Group has tested the impairment of the brokerage license and as a result, no impairment loss has been recorded during the current year. The recoverable amount is determined using a value in use determined by using discounted cash flow model, which uses inputs that consider features of the brokerage business and its regulatory environment. The recoverable amount is calculated by estimating streams of free cash flows available to shareholders over the next five years, discounted to their present values. The terminal value reflecting all periods beyond the fifth year is calculated on the basis of the forecast of fifth-year profit, the applicable cost of equity is 6.72% and the long-term growth rate 1.9% after applying a further illiquidity discount of 15%.

The model used to determine the recoverable amount is most sensitive to changes in the forecast free cash flows available to shareholders in years one to five, the cost of equity and to changes in the long-term growth rate. The applied long-term growth rate is based on real growth rates and expected inflation. Free cash flows available to shareholders are estimated on the basis of forecast results, which take into account business initiatives and planned capital investments. The Group has also performed a sensitivity analysis by varying these input factors by a reasonable margin. Based on such analysis, there are no indications that intangible assets with indefinite useful life are impaired.

12 **BORROWINGS**

Borrowings include local term loans and Murabaha which bear a floating interest rate between 2% to 3% per annum above CBK rate (2019: 2% to 3% per annum above CBK rate).

Following is the classification of borrowings based on their maturity:

	2020 KD	2019 KD
Current Non-current	2,300,000 6,238,126	10,392,371 500,000
Total	8,538,126	10,892,371

During the year, the Parent Company signed a new credit facility agreement with an amount of KD 1,500,000 with a floating interest rate of 2% per annum above CBK rate. The Parent Company utilized the full amount of such facility.

During the year, the Parent Company renewed credit facility of KD 7.6 million which was due on October 2020 for an additional 5 years with an interest rate of 2% per annum above CBK discount rate. Such interest rate to be increased annually to reach 3% above CBK discount rate by the end of 2025.

The Parent Company has met the borrowings covenants, which are as follows:

- Current assets to total liabilities not be less than 10%
- Current assets to current liabilities ratio not less than 2:1
- Total equity not less than KD 30,000,000
- Total liabilities to total equity not to exceed 1:1.5
- Minimum coverage of assets pledged is 120% of the outstanding borrowings balance

Borrowings obtained by the Group are in Kuwaiti Dinars.

Nominal value (fils)	100	100	100	100		

Capital of the Parent Company has been paid in cash.

14.2 Statutory reserve

In accordance with the Companies' Law and the Parent Company's Articles of Association, a minimum of 10% of the profit for the year before contribution to Kuwait Foundation for Advancement of Sciences, directors' remuneration, National Labor Support Tax and Zakat expense shall be transferred to the statutory reserve based on the recommendation of the Parent Company's board of directors. The annual general assembly of the Parent Company may resolve to discontinue such transfer when the reserve exceeds 50% of the issued share capital. The reserve may only be used to offset losses or enable the payment of a dividend of 5% of paid up share capital in years when profit is not sufficient for the payment of such dividend due to absence of distributable reserves. Any amounts deducted from the reserve shall be refunded when the profits in the following years suffice, unless such reserve exceeds 50% of the issued share capital.

The Parent Company's Board of Directors has proposed to transfer an amount of KD 75,000 to statutory reserve for the year 2020 (2019: KD 100,000).

14.3 Voluntary reserve

In accordance with Companies' Law and the Parent Company's Article of Association, the Board of Directors may propose appropriation from the profit for the year to the voluntary reserve. The Parent Company's Board of Directors has not proposed to transfer any amount to the voluntary reserve for the year 2020 (2019: KD Nil).

14.4 Treasury shares

	2020	2019

17 EARNINGS PER SHARE ATTRIBUTABLE TO EQUITY HOLDERS OF THE PARENT COMPANY

Basic EPS are calculated by dividing the profit for the year attributable to ordinary equity holders of the Parent Company by the weighted average number of ordinary shares outstanding during the year. Diluted EPS is calculated by dividing the profit attributable to ordinary equity holders of the Parent Company by the weighted average number of ordinary shares outstanding during the year plus the weighted average number of ordinary shares that would be issued on conversion of all the dilutive potential ordinary shares into ordinary shares.

As there are no dilutive instruments outstanding, basic and diluted earnings per share are identical.

20 SEGMENT INFORMATION

Operating segments are identified on the basis of internal reports that are regularly reviewed by the decision makers (i.e. the Executive Committee) in order to allocate resources to the segments and to assess their performance. The Group's main activities are organized and managed through four major segments as follows:

Finance

This segment provides consumer loans to individuals and commercial loans to corporate entities and individual customers.

Asset management

This segment provides services of portfolio management and custody services for clients, as well as management of mutual funds.

Investment and corporate finance

This segment monitors the Parent Company's direct investments and also provides investment banking services as well as financial consultancy services for clients.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS As at 31 December 2020

As at 31 December 2020

21 FAIR VALUE MEASURMENTS

The fair value of financial assets and financial liabilities that are traded in active markets are based on quoted market prices or dealer price quotations. For all other financial instruments the Group determines fair values using valuation techniques.

The Group measures fair values using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurements:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities.

Level 2: inputs other than quoted prices included within Level 1 that are observable either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using quoted prices for identical or similar instruments in market that are considered less than active or other valuation techniques in which all significant inputs are observable from market data.

Level 3: valuation techniques which use inputs that have a significant effect on the recorded fair value that are not based on observable market data.

The following table shows the fair value measurement hierarchy of the Group's financial assets recorded at fair value:

2020	Level 1 KD	Level 2 KD	Level 3 KD	Total fair value KD
Financial assets at fair value through profit or loss Financial assets at fair value through other comprehensive	1,358,968	-	2,047,701	3,406,669
income Finance receivable at fair value through other	77,593	51,788	4,826	134,207
comprehensive income Investment properties	- -	3,636,000	10,388,032	10,388,032 3,636,000
2019	Level 1 KD	Level 2 KD	Level 3 KD	Total fair value KD
Financial assets at fair value through profit or loss Financial assets at fair value through other comprehensive	2,981,187	-	2,047,701	5,028,888
income Finance receivable at fair value through other	40,452	83,344	4,911	128,707
comprehensive income Investment properties	- -	3,800,000	9,211,627	9,211,627 3,800,000

The valuation method used in Level 3 for equity instruments is the net book value method adjusted for illiquidity discounts by 20%. Increase /decrease in discount rate by 5% would change the fair value by KD 102,385.

The valuation method used in Level 3 for finance receivables at fair value through other comprehensive income is the discounted cash flow method. Increase /decrease in discount rate by 5% would change the fair value by KD 32,334.

The fair value of the financial assets and liabilities other than those mentioned above are not materially different than their carrying value.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS As at 31 December 2020

21 **FAIR VALUE MEASURMENTS (continued)**

The following table represents the changes in Level 3 instruments for the years ended 31 December 2020 and 2019:

	As at 1 January 2019 KD	Change in fair value KD	Additions / settlements KD	Transfer to assets classified as held for sale KD	As at 31 December 2019 KD	Net gains in the consolidated statement of income KD
Financial assets at fair value through profit or loss Financial assets at fair value	2,372,917	213,215	366,212	(904,643)	2,047,701	-
through other comprehensive income Finance receivables at fair	4,718	193	-	-	4,911	-
value through other comprehensive income	8,947,126	16,023	248,478	-	9,211,627	20,456
	11,324,761	229,431	614,690	(904,643)	11,264,239	20,456

There were no transfers between Level 1 and Level 2 fair value measurements during the year, and no transfers into or out of Level 3 fair value measurements during the year.

As at 31 December 2020

22 FINANCIAL RISK MANAGEMENT

The Group's activities expose it to a variety of financial risks: market risk, credit risk and liquidity risk. Market risk is being subdivided into foreign currency risk, equity price risk, interest rate risk and prepayment risk. The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Group's financial performance.

The Group has a risk management division whereby risks are identified, measured and monitored.

Following is the general framework of the risk management policies applied in the Group.

Risk management structure

Board of Directors

The Board of Directors of the Parent Company is responsible for developing the overall risk management framework, and approving risk management strategies.

The Board has established a Risk Committee (the 'RC') comprising of members from the Board, to set the framework and monitor the Group's Risks and Control related requirements covering all risk types like credit, market, liquidity risks and operational risk. The Risk Committee is assisted in these functions by the Head of Risk Management Division.

The Board has also established an Audit Committee (the 'AC'), as required by the regularities parties, which, amongst other functions, is also required to monitor adherence with the Group's Risk Management principles, policies and procedures. The Group's Audit Committee is assisted in these functions by the Head of Internal Auditor Division.

Risk management and reporting system

Monitoring of risks is managed through reports provided by Risk Management division and through limits set by the Board of Directors. These limits reflect the Group's business strategy and market conditions and the environment in which the Group is operating.

Risk management policies are established to identify, quantify, control, mitigate, and analyze the risks faced by the Group to set appropriate risk limits and controls and to monitor risks and ensure adherence to the risk appetite limits. Risk management policies are subject to review regularly, on an ongoing basis, to reflect changes in economic environment, market conditions, products and services offered by the Group.

22.1 Market risk

Market risk is the risk that the value of an asset will fluctuate as a result of changes in market variables such as foreign exchange rates, equity prices, interest rates and prepayment whether those changes are caused by factors specific to the individual instrument or its issuer or factors affecting all instruments traded in the market.

(a) Foreign currency risk

Foreign currency risk is the risk that the value of a financial instrument will fluctuate due to a change in foreign exchange rates. The Group is exposed to foreign exchange risk arising from currency exposures mainly with US Dollar, Bahrain Dinar, Saudi Riyal, United Arab Emirates Dirham and Qatari Riyal.

Foreign currency risk management framework

The Group monitors foreign currency exposure on an ongoing basis, appropriate decisions are taken to minimize the exposure to a specific currency when required.

As at 31 December 2020

22 FINANCIAL RISK MANAGEMENT (continued)

22.1 Market risk (continued)

Had the exchange rate of the following currencies increased/decrease by 5% against the Kuwaiti Dinar, with all other variables held constant, the Group's consolidated statement of income and other comprehensive would have been shifted by the following amounts:

	2020		2019		
Currency	Impact on the consolidated statement of income KD	Impact on OCI KD	Impact on the consolidated statement of income KD	Impact on OCI KD	
Currency	RD	ΚD	KD	KD

QAR	3,916	-	1,999	-	
Others	747	236	3,460	231	

(b) Equity price risk

Equity price risk is the risk that the fair values of equity investments will fluctuate as a result of changes in the level of equity indices or the value of the individual share prices. The Group is exposed to equity price risk arising from financial assets that are classified as "investments at fair value through other comprehensive income", or "at fair value through profit or loss".

Equity price risk management framework

To manage this risk, the Group diversifies its investments in various segments to avoid concentration risk. Furthermore, the Group has its own policies in terms of studying and evaluating investment opportunities. These policies are implemented through the authority matrix approved by the Board of Directors.

For unquoted investments, the Group prepares on a regular basis studies to determine the fair value of this investment.

The table below summarizes the impact of an increase in the various stock exchange indexes on the Group's consolidated statement of income and on other comprehensive income. The following analysis is based on the assumption that the equity indexes would increase/decrease by 5% with all other variables held constant.

	Impact on the c Statement o		Impact on other comprehensive income		
Description	2020	2019	2020	2019	
-	KD	KD	KD	KD	
Kuwait stock exchange	78,677	135,918	83,244	135,984	
Other	15,989	27,530	15,989	27,530	
Total	94,666	163,448	99,233	163,514	

As at 31 December 2020

22 FINANCIAL RISK MANAGEMENT (continued)

22.1 Market risk (continued)

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group's exposure to the risk of changes in market interest rates relates primarily to the Group's short-term debt obligations with floating interest rates.

The Group manages its interest rate risk by having a balanced portfolio of fixed and variable rate financial assets and financial liabilities. Further, the Group's policy is to manage its interest cost by availing competitive credit facilities from local financial institutions and constantly monitoring interest rate fluctuations.

Interest rate risk management framework

The Group manages this risk by monitoring the changes in the interest rates and studying the effects on its cash flows.

Had interest rates increased by 50 basis points of the interest rate applied, the net profit for the year of the Group would have decreased by KD 40,257 for the year ended 31 December 2020 (2019: KD 59,971).

(d) Prepayment risk

Prepayment risk is the risk that the Group will incur a financial loss because its clients and counterparties repay or request to repay the loans earlier; for example for loans which have fixed interest rate during the periods of witnessing a decline in interest rate. The Group is not significantly exposed to prepayment risk.

22.2 Credit risk

Credit risk is the risk that the counter party will cause a financial loss to the Group by failing to discharge an obligation. This includes the risk of decline in the credit standing of the customer. While such decline does not imply default, it increases the probability of the customer defaulting. Financial instruments that are exposed to credit risk are bank balances, finance receivables at fair value through other comprehensive income, finance receivables at amortised cost, financial assets at amortised cost and other assets.

The Group manages the credit risk related to bank balances and cash in investment portfolios through dealing with local and foreign financial institutions, which have a good credit reputation, while for the finance receivables (FVOCI and amortised cost) the Group established credit policies to mitigate the credit risk of such receivables.

Credit risk management framework

The Group has placed credit policy to define the criteria of credit granting which is approved by the Board of Directors. Any amendment to that policy has to be approved by the Board of Directors. Furthermore, authority matrix in credit granting has been set as part of the credit policy. The Board has also approved the Executive Committee (the 'EC') Charter. Moreover, the role of the Executive Committee includes the decision on granting credit that exceeds a specific limit. The Board of Directors has the ultimate authority to grant credit if the credit amount is above the authority limit of the Executive Committee.

The Risk Management Department provides independent opinion and assessment of risk for every financing and investment proposal presented to the approving authorities for decision making.

The Group manages its credit facilities portfolio with the objective of ensuring that it is well diversified and it earns a level of return commensurate with the risks it assumes, at the same time, seeks to ensure the quality of the credit portfolio.

In addition, the Group endeavors to manage the credit exposure by obtaining collaterals where appropriate and limiting the tenor of exposure or structures that are beneficial to the overall risk profile of the Group's credit risk exposure.

As required by the CBK, the Group has established an internal Credit Provisioning Committee (CPC) at the executive level, which is primarily responsible for the study and evaluation of the existing credit facilities of the Group, to identify any abnormal situations and difficulties associated with a customer's position which may require the exposure to be classified as irregular, and to determine an appropriate provisioning required for impaired/ potential impairment of assets.

As at 31 December 2020

22 FINANCIAL RISK MANAGEMENT (continued)

22.2 Credit risk (continued)

Assessment of expected credit losses

Definition of default and cure

The Group considers a financial asset to be in default and therefore Stage 3 (credit impaired) for ECL calculations when:

- Significant financial difficulty of the borrower or issuer
- A breach of contract such as default or past due event
- The disappearance of an active market for a security because of financial difficulties
- Purchase of a financial asset at a deep discount that reflects the incurred credit loss
- All rescheduled facilities
- Retail facilities from commencement of legal recourse

Any credit impaired or stressed facility that has been restructured during the year would also be considered as in default.

The Group considers a variety of indicators that may indicate unlikeliness to pay as part of a qualitative assessment of whether a customer is in default. Such indicators include:

- breaches of covenants
- borrower having past due liabilities to public creditors or employees
- borrower is deceased

The Group considers financial assets as "cured" (i.e no longer be in default) and therefore reclassified out of stage 3 when it no longer meets any of the default criteria. In respect of restructured facilities which are classified in stage 3, there would require to complete the moratorium period (if any) and meet the scheduled payments for at least 1 year (except for retail facilities) or as determined by the Group for consideration for classifying the facility in stage 2 / stage 1.

Significant increase in credit risk

The Group continuously monitors all assets subject to ECLs. In order to determine whether an instrument or a portfolio of instruments is subject to 12 months ECL or life time ECL, the Group assess whether there has been a significant increase in credit risk since initial recognition.

All financial assets, except retail finance (consumer and housing loans), that are more than 30 days past due are deemed to have significant increase in credit risk since initial recognition and migrated to stage 2 even if other criteria don't indicate a significant increase in credit risk. Retail finance (consumer and housing loans) however, migrate to stage 2 based on more than 60 days past due movement.

Measurement of ECLs

ECLs are probability-weighted estimates of credit losses and are measured as the present value of all cash shortfalls discounted at the effective interest rate of the financial instrument. Cash shortfall represents the difference between cash flows due to the Group in accordance with the contract and the cash flows that the Group expects to receive. The key elements in the measurement of ECL include probability of default (PD), loss given default (LGD) and exposure at default (EAD). The Group estimates these elements using appropriate credit risk models, nature and value of collaterals, forward-looking macroeconomic scenarios, etc.

The Group calculates ECL on credit facilities classified in stage 3 at 100% of the defaulted exposure net of value of eligible collaterals after applying applicable haircuts.

The Group in estimating ECL for credit facilities has taken into consideration the following key parameters based on inputs from CBK:

- Floor for estimating PDs for specific portfolios
- Eligible collateral with haircuts for determining LGD
- Deemed maturity for exposures in stage 2

As at 31 December 2020

22 FINANCIAL RISK MANAGEMENT (continued)

22.2 **Credit risk (continued)**

Assessment of expected credit losses (continued)

Internal rating and PD estimation process

In managing its portfolio, the Group utilises ratings and other measures and techniques which seek to take account of all aspects of perceived risk. The Group has its internal model that are then leveraged for PD estimation process

The Probability of Default (PD) is the likelihood that an obligor will default on its obligations in the future. IFRS 9 requires the use of separate PD for a 12-month duration and lifetime duration depending on the stage allocation of the obligor. A PD used for IFRS 9 should reflect the Group's estimate of the future asset quality. The through-the cycle (TTC) PDs are generated from the model based on the internal credit assumptions. The Group converts the TTC PDs to point-in-time (PIT) PD term structures using appropriate models and techniques.

The Group assesses the PD for its retail portfolio through days past due. The retail portfolio is further segmented statistically and risk pools with shared risk characteristics.

Exposure at default

Exposure at default (EAD) represents the amount which the obligor will owe to the Group at the time of default. EAD is estimated taking into consideration the contractual terms such as interest rates, frequency, maturity, pre-payment options, amortization schedule, etc.

Loss given default

Loss given default (LGD) is the magnitude of the likely loss if there is a default. The Group estimates LGD parameters based on the history of recovery rates of claims against defaulted counterparties. The LGD models consider the structure, collateral, seniority of the claim, and recovery costs of any collateral that is integral to the financial asset.

Incorporation of forward-looking information

The Group considers key economic variables that are expected to have an impact on the credit risk and the ECL in order to incorporate forward looking information into the ECL models. Key economic variables include, Gross Domestic Product and Unemployment rate. These primarily reflect reasonable and supportable forecasts of the future macro-economic conditions. The consideration of such factors increases the degree of judgment in determination of ECL. The Group employs statistical models to incorporate macro-economic factors on historical default rates. The Group considers 3 scenarios (base, best and worst) of forecasts of macro-economic data separately for each segments and appropriate probability weights are applied to these scenarios to derive a probability weighted outcome of expected credit loss. The management reviews the methodologies and assumptions including any forecasts of future economic conditions on a regular basis.

Maximum exposure to credit risk without taking account of any collateral

The maximum exposure to credit risk as at the reporting date is the carrying values of the financial assets net of impairment recorded in the consolidated financial statements that are subject to credit risk without considering any collaterals.

Bank balances are neither past due nor impaired and are placed with high credit rating institutions.

Hereunder, the assets exposed to credit risk without considering the collateral.

, 1	2020	2019
	KD	KD
Bank balances and cash	10,666,514	5,345,095
Finance receivables – FVOCI	10,388,032	9,211,627

Financial assets – amortised cost *	372,111	910,262
Other assets	9,553,950	5,450,440
	34,248,255	24,932,615

As at 31 December 2020

FINANCIAL RISK MANAGEMENT (continued) 22

Credit risk (continued) 22.2

Maximum exposure to credit risk without taking account of any collateral (continued)

*Financial assets at amortised costs represents gross amount of KD 462,916 (2019: KD 1,030,963) offset by ECL provision of KD 90,805 (2019: KD 120,701). For details of other financial assets, refer to respective notes.

Where financial instruments are recorded at fair value, the amounts shown above represent the current credit risk exposure but not the maximum risk exposure that could give rise in the future as a result of changes in value.

Risk concentrations of the maximum exposure to credit risk

Concentrations of credit risk arise when a number of counterparties are engaged in similar business activities, or activities in the same geographic region or exposed to similar economic environment that would cause their ability to meet contractual obligations and be similarly impacted by changes in economic, political and/or other conditions. The Group is not significantly exposed to risk concentration.

Credit risk mitigation

Credit risk mitigation techniques that the Group is permitted to use are obtaining collateral where appropriate and limiting the tenor of exposure or structures that are beneficial to the Group's management of risks to an exposure.

Commercial finance receivables are secured against investments in quoted and unquoted securities, real estate properties, bank guarantees and vehicles. Management monitors the market value of collaterals and may request additional collaterals in accordance with the underlying agreement, during its review of the adequacy of the provision for credit losses.

As of 31 December 2020, the finance receivables, which are fully covered by collaterals, represent 8% (2019: 9%) of the gross balance of finance receivables less deferred income.

Credit quality per class of financial assets

The table below shows the credit quality and the maximum exposure to credit risk for the year ended 31 December 2020 and 2019 based on year-end stage allocation for consolidated statement of financial position lines by class of assets. The amounts presented are gross of impairment allowances.

2020	Stage 1 KD	Stage 2 KD	Stage 3 KD	Total KD
Bank balances and cash Finance receivables – FVOCI	10,666,514 7,363,025	- 1,050,634	- 1,837,697	10,666,514 10,251,356
Finance receivables – Amortised cost	2,684,270	14,272	2,691,010	5,389,552
Financial assets – Amortised cost	462,916	-	-	462,916
Other assets	9,553,950		3,013,211	12,567,161
As of December 2020	30,730,675	1,064,906	7,541,918	39,337,499
2019	Stage 1 KD	Stage 2 KD	Stage 3 KD	Total KD

Finance receivables – Amortised cost	3,014,522	305,980	3,744,971	7,065,473
Financial assets – Amortised cost	1,030,963	-	-	1,030,963
Other assets	5,450,440	-	1,275,730	6,726,170
As of December 2019	23,088,277	709,287	5,576,110	29,373,674

The Group internally classified the various credit risk exposure which are neither past due nor impaired into two categories of credit quality (high quality and Standard quality).

The Group classifies its regular commercial clients for which collaterals are obtained according to risk exposure as the following:

- High Quality: Regular exposures with a normal risk covered fully by securities and real estate collaterals in excess of 100% of the outstanding amount.
- **Standard Quality:** All other regular exposures.

As at 31 December 2020

22 FINANCIAL RISK MANAGEMENT (continued)

22.2 **Credit risk (continued)**

	1,536,164	1,784,338	3,320,502		

22.3 Liquidity risk

Liquidity risk is the risk that the Group will be unable to meet its financial liabilities when they fall due.

Liquidity risk management framework

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities. To provide liquidity, the Group is managing its assets to provide the required liquidity and monitoring the cash flows on regular basis by estimating the future cash flows and keeping liquid assets at a minimum 10% from its liabilities.

The table below analyses the Group's financial assets and liabilities into relevant maturity groupings based on the remaining period at the consolidated financial statements. Balances due within 12 months from reporting date equal their carrying balances, as the impact of discounting is not significant.

Capital risk management

The Parent Company's objectives when managing capital are to safeguard its ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders. To maintain or change the capital structure, the Parent Company may adjust the dividends paid to the shareholders, or return the capital, or issue new shares or sell assets to reduce its debts. In order to maintain or adjust the capital structure, as followed by other companies in the same business, the Group monitors capital on the basis of gearing ratio. The ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings less bank balances and cash. Total capital is calculated as equity as shown in the consolidated statement of financial position plus net debt.

The gearing ratio as of 31 December is as follows:

	2020 KD	2019 KD
Total borrowings (Less) Bank balances and cash	8,538,126 (10,666,514)	10,892,371 (5,345,095)
Net debt Total equity	(2,128,388) 41,876,055	5,547,276 40,393,228
Total capital	39,747,667	45,940,504
Gearing ratio	(5.35%)	12.07%

23 FIDUCIARY ASSETS

Portfolios, funds, finance portfolios and other portfolios under the management of the Parent Company amounted to KD 250,219,348 (2019: KD 273,654,879).

Management fee related to these fiduciary assets amounted to KD 700,692 for the year ended 31 December 2020 (2019: KD 752,886).

As at 31 December 2020

CONTINGENT LIABILITIES 24

The Group has outstanding legal cases with one of the client's portfolios, where the client claims an amount of KD 2 Million, while the Group claims an amount of KD 1.9 Million. A preliminary verdict has been issued in the Group's favour and rejected the client's claim. The client appealed on 13 July 2017 and the appeal court has transferred the case to the Experts department.

On 16 May 2019, a final verdict has been issued in the Group's favour and rejected the client claim. The Group believes, there is no need to take any additional provision based on the current legal status of the legal case.

During the year, the Group took executive actions to liquidate the pledged assets to be used as a settlement of the claim amount.

The Group has the adequate provisions against the amounts due from the client after taking the collaterals value into consideration (Note 8).

COVID-19 IMPACT 25

The coronavirus ("COVID-19") pandemic has spread across various geographies globally, causing disruption to business and economic activities. COVID-19 has brought about uncertainties in the global economic environment. In response, governments and central banks have launched economic support and relief measures (including payment reliefs) to minimize the impact on individuals and corporates. In light of the rapidly escalating situation, the Group has considered whether any adjustments and changes in judgments, estimates and risk management are required to be considered and reported in the consolidated financial statements.

In the determination of expected credit losses estimates, the Group has considered the potential impact (based on the best available information) of the uncertainties caused by the COVID-19 pandemic. The uncertainties caused by COVID-19 required the Group to update the inputs and assumptions used for the determination of expected credit losses ("ECLs") as at 31 December 2020.

The Group has re-assessed the scenario weighting to reflect the impact of current uncertainty in measuring the estimated credit losses for the year ended 31 December 2020. In making estimates, the Group assessed a range of possible outcomes by stressing the previous basis (that includes best, based case and worst scenarios) and changed the worst weightings. The probability of the worst scenario was increased from 10% to 80% and the probability of the best scenario and base case scenario was reduced from 10% to 5% and 80% to 15% respectively. The increase in the downturn weighting of the macro economic scenario, current situation and the management overlays result in an additional ECL charge for finance receivables of KD 1,563,225 for year ended 31 December 2020 (2019: KD 245,081 ECL recovery of finance receivables).

The Group continues to individually assess significant corporate exposures to adequately safeguard against any adverse movements due to COVID-19.

Uncertainty relating to COVID-19

The uncertainties caused by COVID-19 have also required the Group to reassess the inputs and assumptions used for the determination of fair value of financial and non-financial assets as at 31 December 2020. The Group has considered potential impacts of the current economic volatility in determination of the reported amounts of the Group's financial and non-financial assets and these are considered to represent management's best assessment based on observable information.

The Group acknowledges that certain sectors in which these assets are located are negatively impacted, and as the situation continues to unfold, the Group will continuously monitor the market outlook and use relevant assumptions in reflecting the values of these financial and non-financial assets as and when they occur.
